To Whom It May Concern,

I am writing in regards to the new policy to test the hair, saliva, etc. of federal employees for illicit drugs. Certainly there are reasons to test federal employees for drug use and for concerns that a simple urine sample will not provide the same information as other tests. The concern I have, however, is that employees' DNA will also be extracted and entered into a database. Safeguards have to be implemented to prevent such extraction and abuse of Fourth Amendment freedoms that we as Americans hold so dear.

Sincerely,

Russell Weisfield
